How to be notified of new releases

Keeping your software up to date is always highly recommended. Keep in mind that we keep working to improve our software and to fix bugs, so updates and upgrades are of the utmost importance for your experience with the software and for your overall safety.

There are two main ways to know when a new release of our software becomes available:

1. Our official release notes: this is for those who like a proactive approach, visit this web page from time to time to check if there is a new release
2. Our Telegram channel: this is a more *passive* (yet, arguably more effective) way that doesn't imply any effort on your end, simply subscribe to this Telegram channel and be notified whenever an update is available

Thank you for always keeping your software up to date.
